-warm humid summer and cool winter

-regions: Australia, New Zealand,  
southern South America and southern Europe

-trees: laurel

Types of biomes (deciduous deciduous forest)

# Review of the whole trip to Italy

It was my first trip abroad from school.

At first I was worried that something would go wrong, but everything was fine.

If I had to sum up the family I stayed with along with Sophie Curran, they were nice, welcoming, always wanting to talk and stuff.

So I had the chance to practice my English and maybe even improve it, so I'm glad for that.

Thank you to all of my family, teachers and others for a great trip.
